### **Grant Mize Joins Moore Freight Service as Director of Operations**

*Operational Restructuring, Capital Investments, and Driver Recruitment Expected to Fuel Company Growth*

**Knoxville, TN**, November 2, 2007—Knoxville, Tennessee-based Moore Freight Service, a company specializing in flat glass transportation in the Southeastern and Midwestern United States, today announced that Grant Mize, formerly with Maverick USA, Inc., of Little Rock, Arkansas, has joined their company as Director of Operations. Mize plans to utilize his comprehensive industry knowledge and experience to facilitate the continued growth of this quickly expanding freight service company.

“We are excited to work with Mize, who has 20 years of industry experience in our niche market of flat glass hauling, along with a reputation for integrity among the close-knit glass haulers and manufacturers,” says Dan Moore, chief executive officer of Moore Freight Service.

By bringing Mize on board to oversee operations and expending the necessary capital for fleet and equipment expansions, Moore Freight Service plans to fast track their growth within the very competitive flat glass industry.

Establishing optimal lanes, minimizing deadheading, efficient equipment management, and driver and customer recruitment are at the forefront of Mize’s immediate operational goals for Moore Freight Service.

“My first line of business will be to achieve a more streamlined operation, utilizing my industry knowledge to initiate and integrate immediate changes that will facilitate Moore Freight Service’s growth potential,” says Mize.

Intensive driver recruitment is anticipated by Moore Freight Service, which offers a small business environment uniquely focused on drivers’ needs, including an on staff chaplain.

Moore Freight Service has also broken ground adjacent to its current site for a new corporate office building that will open in early 2008.

“Our new corporate office will house several functions including executive offices, sales offices and a chapel,” says Moore. “As we grow to meet our customers’ needs, we are equally focused on serving the personal and professional interests of our burgeoning employee base.”

#### **About Moore Freight Service**

Moore Freight Service began operations in 2001. It offers motor carrier service for truckload shipments of flat glass - both crated and uncrated - on flatbed, single dropframe and double dropframe trailer equipment. Transporting flat glass presents unique challenges requiring expert knowledge, specific skill and specialized equipment. With its combined 65 years of industry experience, the safe loading, securing, tarping and transporting of flat glass is the company’s expertise.

Moore Freight Service is proud to employ the industry’s best drivers, and its trucks, trailers and equipment are all state-of-the-art. Yet, the company proudly considers its greatest assets to be the excellent relationships and reputation it has carefully cultivated within the industry.
